Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings were received on 1/12/07. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Amamori (US 2002/0125696 A1.) Regarding claim 6 and 8, Amamori (Figures 1 and 3) teaches a curtain airbag (20) stored along a roof side rail (32) including a mounting bracket (18) for a set belt anchor that is provided separately from the mounting bracket (the belt stalk 18 is used to hold a deflection fitting (see paragraph 13, the deflection fitting is fairly understood to be a term in the art that is an anchor.) As shown in Figure 3, the mounting bracket underpasses the curtain airbag between the side rail and the airbag, and has a rising member (turned portion at the top of bracket 18, shown in Figure 3.) Regarding claim 8, at least part of the airbag is above the rising member.

Allowable Subject Matter

4. Claims 9-16 are allowed.
5. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 1/12/07 have been fully considered and those arguments with respect to Tanase are persuasive. However the Examiner respectfully disagrees with respect to Amamori. The belt anchor stalk (18) is used to hold a deflection fitting (see paragraph 13). The deflection fitting is reasonably and well understood to be a term in the art that is known as an anchor. As such the belt stalk is reasonably considered to be a mounting bracket for an anchor that is separate.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
